WHAT IS COST SEGREGATION?

Cost segregation is an IRS-approved, engineer-led tax strategy that reclassifies components of commercial and investment real estate (lighting, plumbing, flooring, HVAC, landscaping, specialized equipment, etc.) into shorter depreciation lives — 5, 7, or 15 years instead of the standard 27.5 or 39 years. When combined with current bonus depreciation rules, this accelerates massive front-loaded deductions, dramatically improving client cash flow with no change in total depreciation over the asset's life.

WHY YOUR CLIENTS BENEFIT (Typical Results)

- Typically 20–60% of the building's depreciable basis reclassified to accelerated categories
- First-year tax savings often 10–30x the cost of the study (10-30x ROI for Client)
- Immediate cash flow for reinvestment, debt reduction, acquisitions, or distributions
- Applies to: new purchases, new construction, renovations, and even prior-year “catch-up” depreciation

REAL-WORLD EXAMPLES

- \$1M commercial property → \$80K–\$200K+ in Year 1 accelerated deductions
- \$2M–\$5M multifamily/hotel/office → \$500K–\$1M+ in Year 1 federal tax savings (at 37% bracket)
- Study cost: typically \$3K–\$15K (ROI pays for itself in months)

IDEAL PROPERTIES

- Multifamily, office, retail, industrial, medical, hospitality, self-storage, warehouses
- Generally \$500K+ depreciable basis
- Properties with depreciable basis under \$500K still deliver a minimum 10x ROI
